eCompliance™

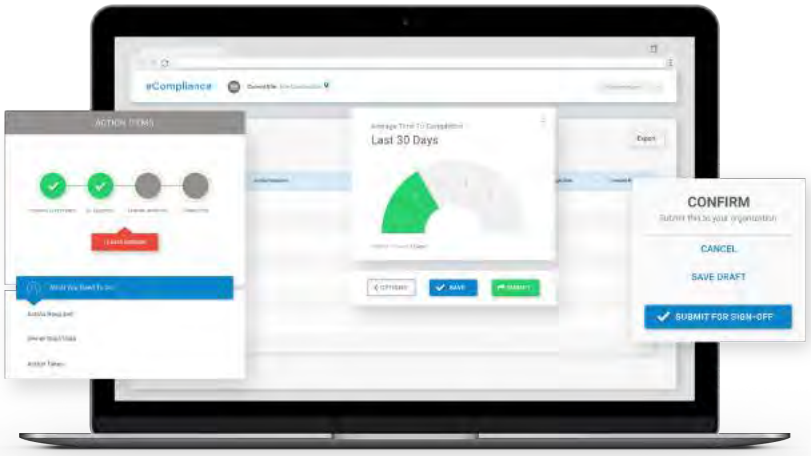
Product Overview

Workplace Health & Safety Management Software
The #1 Solution For Improving Worker Participation

eCompliance

User Friendly Software

eCompliance brings EHS management to the 21st Century.



eCompliance is the #1 solution for increasing company-wide participation in safety.

Our easy-to-use web and mobile app facilitates the cross-company communication and transparency necessary to improve worker engagement levels, safety performance & ultimately, your business.

Key Features:

- >> Real-time dashboards
- >> Mobile inspections
- >> Training management
- >> Document distribution
- >> Leading indicator tracking
- >> Corrective action tracking
- >> Safety standard (OSHA, COR, VPP, ISO) compliance dashboards
- >> Downloadable CEO-ready reports, charts & graphs

AFTER USING ECOMPLIANCE

90%
INCREASE
in worker participation within the first 12 months

70%
BELOW
the industry average for injury rates

$2-6
RETURN
for every $1 spent on safety & injury prevention

eCompliance

Mobile App

Improve Worker Participation with a User-Friendly Mobile App.

Eliminate 1-way communication of paper forms & instantly capture & annotate images of workplace hazards for management to view in real-time.

Our mobile app facilitates 2-way communication between frontline workers and upper management. It increases worker participation & improves the quality of data that management receives from the field.

Using the eCompliance mobile app, you'll be able to:

- >> Instantly identify hazards, assign & track corrective actions
- >> Create a simple means of cross-company communication & encourage company-wide participation in safety
- >> Eliminate site paperwork while reducing time to complete corrective actions by 50%

AFTER USING ECOMPLIANCE

> "I believe we are a safer company by using eCompliance due to the easy flow of our safety data and the ability to trend and share data quickly throughout the company."

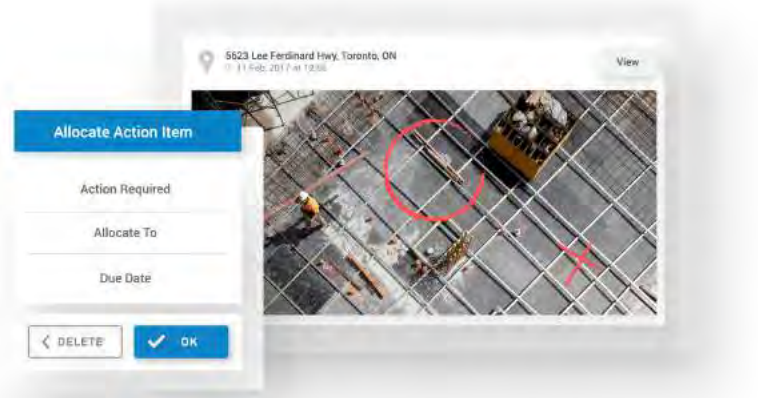
LARRY JOHNSON, QHSE FIELD MANAGER

eCompliance

Corrective Actions

Eliminate hazards faster by reducing the time to close corrective actions.

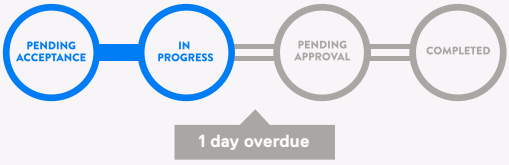


The eCompliance mobile app allows frontline workers to assign corrective actions & track the progress.

Management can see the corrective actions and respond in real-time. This not only creates 2-way communication and encourages company-wide participation in safety, but also provides the transparency necessary to reduce the time to close corrective actions.

By creating transparency & having 2-way communication about corrective actions, you ensure employees are taking hazards seriously & everyone is addressing issues in a timely manner.

>> This not only helps reduce risk but also encourages frontline employees to participate in safety, ultimately creating a stronger safety culture.



AFTER USING ECOMPLIANCE

> **A picture can tell a thousand words and it's easy for maintenance people to see what the problem is. Now, managers can be off site and know exactly what's going on onsite from the pictures and videos.**

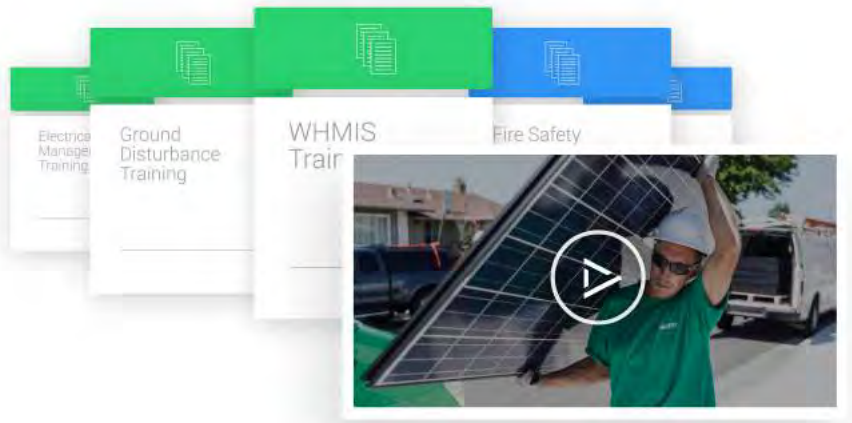
Employee Training

Simplify how you track employee training records.



Ensuring employees are up-to-date on their training greatly affects their ability to participate in your safety program.

eCompliance simplifies and automates the training tracking process so that you can guarantee that everyone across your organization is properly trained.

With eCompliance:

- >> No more messy Excel charts
- >> No lost certificates
- >> No wasting time tracking down documents & people
- >> Anticipate the needs of your workforce
- >> Reduce unnecessary liability
- >> Instantly generate reports & dashboards

View reports by:

- >> Job profile
- >> Employee name
- >> Certificates
- >> Training by date range

AFTER USING ECOMPLIANCE

> **“The employee training tracking feature is my favourite. The retraining chart is now my go-to method for ensuring that all of my employees are up to date on their training. The system also sends me automated messages 3 months before training expires which gives me plenty of time to organize retraining.”**

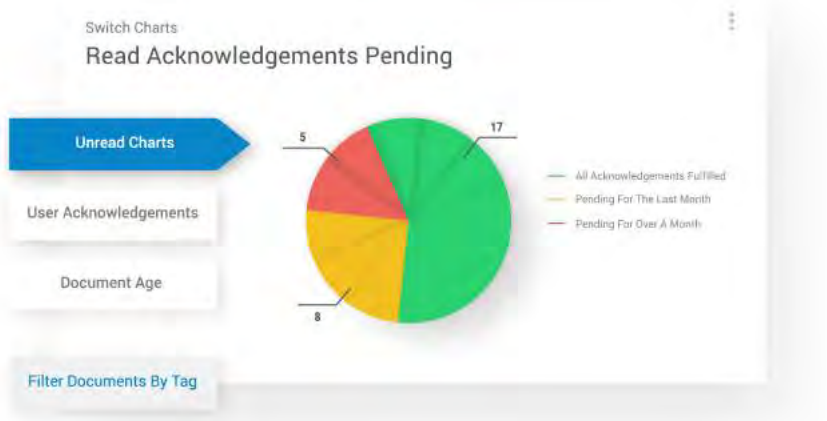
Protect Your Business

eCompliance has user friendly tools that help protect your business.



Reduce your company's risk of liability. With eCompliance, proof of due diligence is built into everything you do.

From complying with your chosen health and safety management system to proving corrective actions, you will be ready for an auditor, customer, or inspector at all times.

Paper processes supported by Microsoft Office limit the ability for 2-way communication and worker participation in safety. With more than 50 employees, you need a better solution. Your accounting, sales, HR, & IT departments use software, so why should you be left behind?

Provide proof that your HSE management system follows industry best practices.

>> Easy to follow operational guidelines ensure that whether you comply with COR, ISO 45001, VPP or others, your web-based management system ensures that you have proper documentation to provide due diligence.

WHAT OUR CLIENTS ARE SAYING

> **"We experienced fewer injuries than industry average, and those that we had were less severe. Incident reporting was immediate and senior management had the necessary information to act when accidents did happen."**

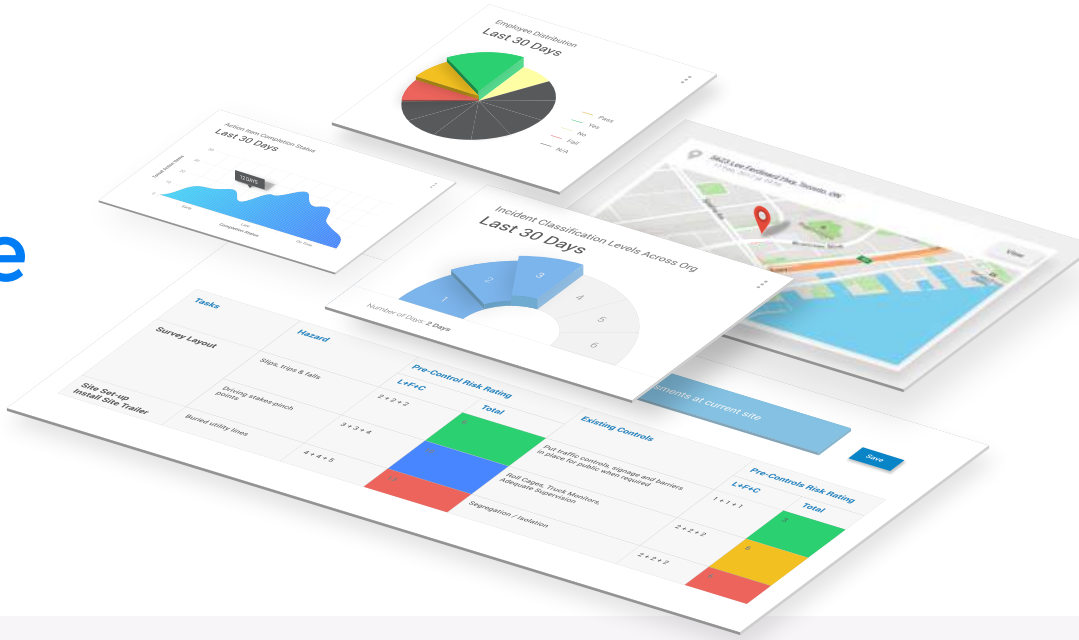
ROGER MCLEOD, MANAGER OF SAFETY AND ENVIRONMENT

eCompliance

Compliance

Ensure your organization is compliant.



Meet & maintain compliance with ISO 45001, ISO 9001, OSHA & COR without the administrative hassle and paper overload.

eCompliance provides you with a real-time dashboard on compliance which you can access at any time and from anywhere.

Stop spending time on administrative paperwork and start spending it on what matters: keeping your team safe!

Follow the step-by-step process:

- >> Instantly prove due diligence
- >> Stay current with EHS regulations as your company grows
- >> Reduce internal and external audit time by 25-50%

Join hundreds of companies across North America that stay ahead of changing EHS requirements with eCompliance.

AFTER USING ECOMPLIANCE

> **"Our systems before eCompliance were on paper. They were fragmented. eCompliance allowed us to put everything together under one umbrella and get reliable safety metrics and cutting edge leading indicators to help improve our safety culture."**

Safety Intelligence

The EHS Industry's First Cloud Analytics and Reporting Solution.

BEST PRACTICE LIBRARY

Leverage a collection of pre-built EHS reports, based on best practices from our growing community of safety leaders. Save time, uncover new insights faster and drive safer outcomes.

INTERACTIVE DASHBOARDS

Data visualizations of all your KPIs for an unrivaled view of safety. Build and analyze charts, graphs and tables in just a few clicks. Manage multiple dashboards for various sites, departments and levels of your organization.

CUSTOMIZED CHARTS

Get the perfectly tailored chart, report or dashboard for your company. Simply identify the unique KPIs you want to track and our Customer Success team will help you build a report around them.

CLIENT & STAKEHOLDER INSIGHTS

Deliver insightful reports about the state of safety at your company. Increase executive engagement in safety initiatives by providing complete transparency into EHS performance.

DETAILED TREND ANALYSIS

Delve deep into your data with analytics for every aspect of your safety program. Easily identify trends and proactively control and mitigate the level of risk in your company.

AUTOMATED REPORTS

Streamline data delivery by scheduling your most critical charts and reports. Arm your team with the information needed to make actionable, real-time decisions.

FORMATTING WIZARD

Create powerful visualizations that stand out and resonate with your audience. Customize your charts and reports by font, color, file format and more.

FILTER / DRILL DOWN CAPABILITIES

Get as granular as you need to see the complete picture. Filter reports by site, location, form type and more to analyze key data and answer important questions.
