

## CASE STUDY

# ARC RESOURCES

## SUMMARY STATEMENT

**ARC Resources partnered with eCompliance to improve management visibility of its inspection & contractor auditing processes using an integrated mobile and web-based safety system.**

With over 90 users in the company, ARC has completed over 1,000 inspections and audits, and has created higher levels of data centralization, transparency and accountability.

## ABOUT ARC RESOURCES

ARC is one of Canada's leading conventional oil and gas companies. Since day one, their vision has been to be a leading oil and gas producer as measured by quality of

assets, management expertise and long-term returns. To achieve this, they have focused on what they call 'risk managed value creation'.

## AFTER USING ECOMPLIANCE

Time to get data into corporate systems

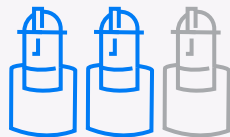

**2-3 DAYS BEFORE**

**SAME DAY AFTER**

# Contractors Audited With Ecompliance

**102**

% Action Items Completed

**BEFORE**

**75-80% COMPLETED**

**AFTER**

**90% COMPLETED**

Administrative Time Spent Per Form

**45-60 MINUTES**

**>5 MINUTES**

## QUANTITATIVE

## BEFORE

- >> Had a good process but with many inefficiencies and lack of overall visibility
- >> Risk of some data being lost in the process as paper piled up on desks
- >> Spending significant time scanning, filing, and faxing paper documents into the system

## AFTER

- >> Centralization and streamlining of contractor safety performance reporting with ISN integration
- >> More robust contractor oversight process through mobile reporting and scoring of audits
- >> Stronger accountability system internally with automatic notifications and follow up of action items.

## IN THEIR OWN WORDS

“

**eCompliance ensures that people are following up on issues and risks, and this aligns with our company values.**

Colin Frost, Health & Safety Advisor — Arc Resources

”

## FAVOURITE FEATURES

USER FRIENDLINESS OF SYSTEM

ACCESSIBILITY OF REAL-TIME DATA

AUTO-SYNC OFFLINE DATA IN THE APP

“

**The link between eCompliance and ISN has allowed us to bring our contractor management process to the next level & help us better understand contractor performance on site vs. only prequalification questions.**

”
