# Top Safety Program Challenges

IN THE Construction Industry

and How to Solve Them

The **construction industry** is one of the **most dangerous industries** where workers are **constantly at risk of injury.** From falls and slips to electrocutions and asbestos, the **construction site is full of health and safety hazards.**

MORE THAN 60%

of accidents occur within a worker's first year on the job[1]

20%

of worker fatalities are in the construction industry in the US[1]

COMPARED TO OTHER INDUSTRIES,

71%

higher injury rates are seen in the construction industry[1]

Organizations can better protect their employees and mitigate risks on-site with an effective and robust safety program

Top Safety Program Challenges in the Construction Industry

Adoption of safety protocols and **front-line engagement in safety**

Communication across multiple teams

Difficulty with training tracking

How a Digital Solution Can Help Overcome These Challenges

A **user-friendly, mobile platform** empowers employees and contractors to take **safety** into **their own hands**

All information in one platform streamlines communication from boardroom executives to front-line workers across multiple sites

Access to **eLearning courses and training tracking** helps ensure training certifications are up to date and **all courses are completed on time**

> We needed an effective way to communicate our safety message to all of our operations and a system that could connect office and field employees as one safety culture. Now we are able to give them relevant information in a short format, at a pace that impacts their job without being a burden on their decision-making.
